

MEMORY CARE

Rehabilitation

AT WESTMINSTER PLACE

RESTORING CONFIDENCE, HONORING MEMORIES

For more than 100 years, Westminster Place has provided care and services for older adults. Now, to better support individuals recovering from illness, injury, or hospitalization, we offer a Memory Care Rehabilitation program.

This program delivers enhanced Rehabilitation services for older adults with neurocognitive disorders, with the goal of improving functional abilities, supporting independence, and facilitating a timely return home.

Westminster Place

A PRESBYTERIAN LIVING COMMUNITY

This unit provides services to support those with neurocognitive and related disorders, but it is not certified under the Alzheimer's Disease and Related Dementias Special Care Disclosure Act.

WHAT MAKES MEMORY CARE REHAB DIFFERENT?

Advanced, Person-Centered Dementia Care

- Memory Care using the GuidePoint Memory Method – team members are trained by on-site Certified Dementia Practitioners® (CDPs), including those in the nursing, activity, and dining departments
- A beautiful community and warm environment with spaces that feel like home
- Personalized care plan that honors the unique needs and wishes of each patient

Experienced, Collaborative Team

- Over 60 staff members with 20+ years of service
- Physicians, therapists, nurses, aides, social workers, dining staff, and activities professionals providing seamless care
- Consistent staff assignments help build strong relationships and ensure a better understanding of each resident's needs

Family-Focused Support

- Personalized “About Me” profiles ensure a personal touch
- Family education and support, including Memory Cafés and support groups
- Ongoing communication with families
- Family support groups in partnership with the Alzheimer's Association®

Secure, Therapy-Focused Environment

- A small, structured Memory Care Rehabilitation neighborhood featuring all private suites, consistent staffing, and an easily navigable layout
- Music, art, and pet therapies
- On-site access to physical, occupational, and speech therapies, including advanced interventions for swallowing and cognitive challenges
